

New versions of the questionnaires: «WAIS-IV - Wechsler Adult Intelligence Scale - IV»

Dear customers,

New versions 2.0 of : «WAIS-IV - Wechsler Adult Intelligence Scale - IV» is now available in the CheckWare Store.

The following changes have been implemented:

1. Quiz – Norwegian

The warning message for invalid values in the subtest "**Lengste Bokstav-tall-serie**" is now functioning correctly and appears as expected.

Important!

- Updates of WAIS-IV is done manually by installing the newest versions (2.0) in the CheckWare store. The updates are irreversible, i.e. it is not possible to go back to the previous version of WAIS-IV (1.0) once the new versions have been installed.
- All respondents will get access to the new versions (2.0) after they are installed, and all clinicians will have access to the newest version of the report after WAIS-IV are updated. Note that all previously submitted questionnaires will still be registered with the previous versions (1.0).
- Assessment plans that have already started will use the previous version of WAIS-IV. Assessment plans that will start after the updated versions are installed will contain the newest versions.
- The update has no bearing on data that has already been collected, i.e. you will not lose existing data.
- The update will not affect continuity of results, nor will it impact score calculation.

If you have any questions about the changes, please send them to support@checkware.com

Best regards, CheckWare AS
